

Prevent Errors That Cause Denials, Higher Costs and Lost Revenue.

Our quality assurance software audits 100 percent of your patient registrations.

Manually reviewing your patient registrations for every type of error is virtually impossible. Inevitably, many errors will go undetected until they reach billing. The result? Rework and denials. EngageCare Registration Quality Assurance automatically audits 100 percent of your patient registrations to detect preventable denials for hundreds of error types. Real-time alerts on the registrar's work queue flag accounts that need corrections prior to billing.

AccuReg Artificial Intelligence learns while it earns.

Hospitals have poured millions of dollars into mid-cycle and back-end software systems to automate transactions, but are they doing the job any better? If just one piece of data is incorrect, a claim will be denied. Even if you have an automated registration tool to help you, if it's not continually adapting, it's just costing you money. AccuReg Integrated Intelligence™ drives a sophisticated rules engine and predictive analytics that wrap around your entire patient registration process to identify payment risks in real time and prevent future denials.

Scan with your phone to watch the EngageCare video.

Capabilities

- Unlimited Edits
- Scheduling, Pre-Registration and Registration Auditing
- Staff Training and Testing
- Scorecards, Dashboards and Ad-hoc Reports
- Address Validation
- Threshold Alerts
- Patient Survey
- E-Forms
- Available Patient Check-In and Patient Arrival Tracker

Outcomes

- Higher Clean Claim Rates
- Less Front-End First Pass Denials
- Less Rework
- Lower Returned Mail Cost
- Improved Consistency, Quality and Speed of Registration
- Higher Patient Satisfaction
- Reduced Wait Times
- Improved Accuracy
- Standardized Registration
- Fewer Errors and Higher Accuracy Rates
